

How to buy and transfer cryptocurrency
anonymously

Bitcoin to Monero

Step 1 – Buy Bitcoin

Do an internet search “how to buy Bitcoin”.

You can use any source available to you, either online or via a crypto ATM.

The service may ask you to provide identification, this is okay as we will be converting the crypto to Monero.

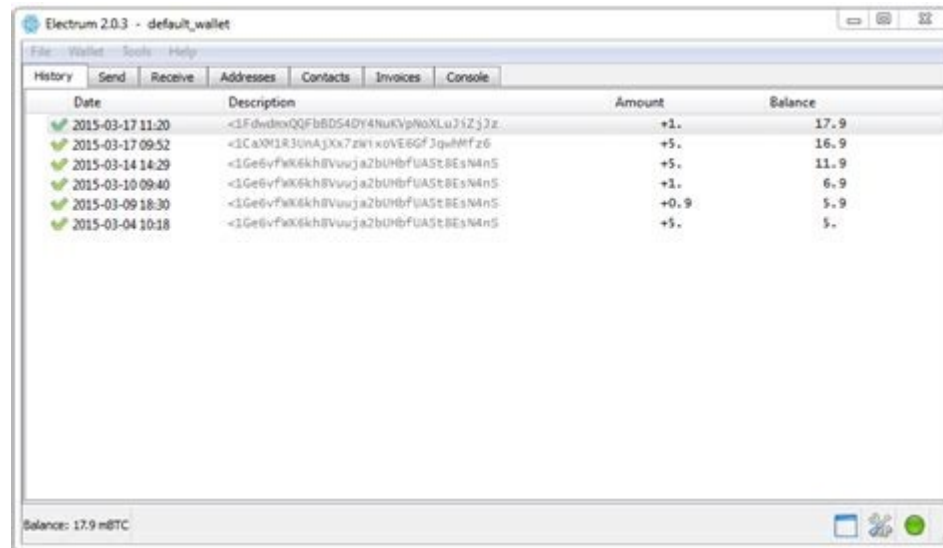

If this is your first time, limit your purchase to a reasonable amount of money, maybe \$50, until you have a full process that works for you.

We do not recommend a single service for obvious reasons. If the service is not listed below, you may wish to check online reviews. Also note, some services charge you a fee to withdraw.

Step 2 – Install Bitcoin Wallet

Download & Install
Electrum Bitcoin wallet – electrum.org

If you need help or instructions on using the wallet, there are tutorial videos on YouTube.

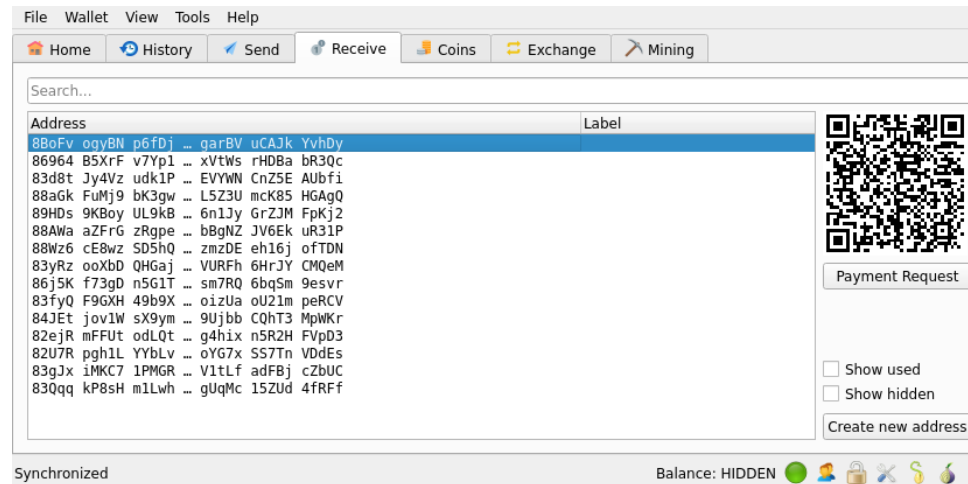

Step 3 – Withdraw to Wallet

Withdraw the Bitcoin you purchased to your installed Electrum Wallet.

Click receive in the Electrum wallet and generate a new address, then instruct whatever service you used to send the Bitcoin to the Electrum wallet address.

Step 4 – Install Monero Wallet

Download & Install Feather Monero wallet – featherwallet.org

If you need help or instructions on using the wallet, there are tutorial videos on YouTube.

Note: if you believe you believe you are under surveillance or need enhanced security, you may wish to install a full Monero node using the full Monero suite from getmonero.org

Step 5 – Swap Bitcoin for Monero

Find a service to swap Bitcoin for Monero

<https://kycnot.me>

<https://simpleswap.io>

<https://stealthex.io>

Using a conversion service, send Bitcoin from your Electrum wallet and receive Monero into your Feather wallet

Step 6 - Done

You now have Monero in your Feather wallet that
can be sent anonymously
