How to buy and transfer cryptocurrency anonymously

Litecoin to Monero

Step 1 – Buy Litecoin

Do an internet search "how to buy Litecoin".
You can use any source available to you, either online or via a crypto ATM.

The service may ask you to provide identification, this is okay as we will be converting the crypto to Monero.
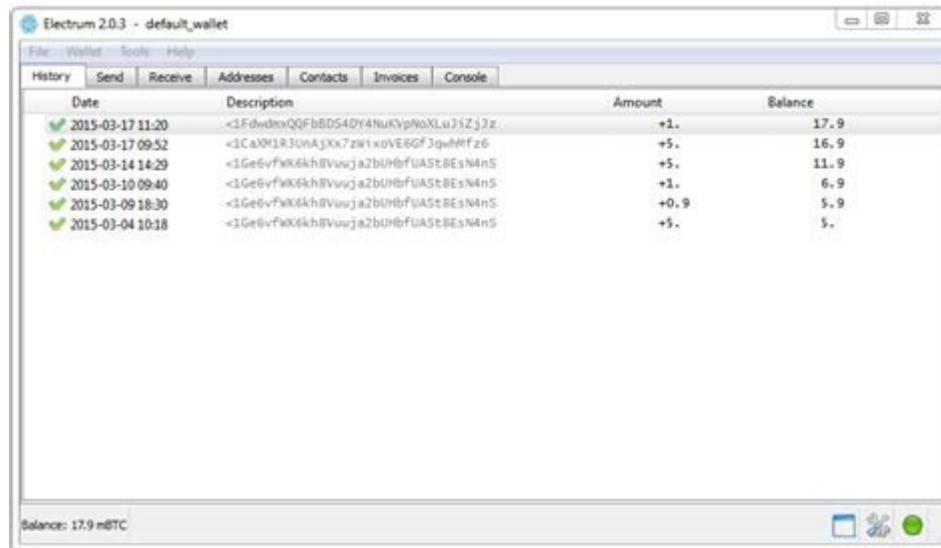

If this is your first time, limit your purchase to a reasonable amount of money, maybe $50, until you have a full process that works for you.

We do not recommend a single service for obvious reasons. If the service is not listed below, you may wish to check online reviews. Also note, some services charge you a fee to withdraw.

Step 2 – Install Litecoin Wallet

Download & Install
Electrum Litecoin wallet – electrum-ltc.org

If you need help or instructions on using the wallet, there are tutorial videos on YouTube.

Step 3 – Withdraw to Wallet

Withdraw the Litecoin you purchased to your installed Electrum Wallet.

Click receive in the Electrum wallet and generate a new address, then instruct whatever service you used to send the Litecoin to the Electrum wallet address.

Step 4 – Install Monero Wallet

Download & Install
